To whom it may concern,

We certify that Mr. Thai Binh Nguyen, date of birth: 10/02/1994, was a full-time Embedded Software Engineer at Swoop Aero. His employment details are as follows:

Start of employment: 09/11/2022

End of employment: 20/06/2023

Position: Embedded Software Engineer

Working hours: 40 hours/week

Type of employment: Full-time

Remuneration: \$90,000 per annum inclusive of super

Duties performed:

- Developing embedded software for devices across a cloud-based logistic drone network, including airborne computers, flight controllers and other peripheral components.
- Conducting research and development for low-level flight features, including autonomous vision-based takeoff and landing.
- Working closely with our Embedded Software Lead to maintain software engineering best practices and create high-quality device-level features on a 2-week sprint cycle.
- Maintaining and enhancing system documents and collaborating with others to ensure cohesive designing interfaces.
- Using a broad skill set, including a deep understanding of operating systems and communication protocols and experience in using tools and frameworks to implement robust solutions rapidly.
- Proactively seeking out ways to use technology to increase our product's effectiveness, performance, and usability to support both our customers and internal staff operations.

If you need further information related to Mr. Thai Binh Nguyen's employment at Swoop Aero, please feel free to contact me.

Best regards,

Andrew Thomas
